

# Environmental Policy

METTLER TOLEDO is committed to doing business in an environmentally responsible manner that minimizes adverse impacts on the environment. We operate our business in compliance with applicable environmental laws and regulations. We strive to use resources in our operations wisely and reduce emissions in all areas. We encourage the conservation of natural resources, avoid the use of hazardous materials where possible, and engage in activities that reuse and recycle.

To achieve the commitments described above we strive to continuously improve our environmental performance and resilience to environmental risks. We are committed to setting and monitoring specific targets and allocate appropriate resources to help us achieve our goals:

- To reduce energy consumption and greenhouse gas emissions.
- To reduce waste and increase recycling.
- To emphasize the sustainable features of our products and services, and continue to expand those features.
- To leverage our responsible sourcing framework, ensuring sustainable conduct throughout our supply chain consistent with this policy

In order to promote transparency and awareness among all stakeholders we will periodically provide clear, accurate, and consistent public disclosure regarding our progress implementing this policy.

This policy applies to all employees and operations in the METTLER TOLEDO Group. We aim to regularly inform and train employees on the importance of these commitments and the impacts their work activities have on the environment. The Group Management Committee is responsible for implementing this policy with Board of Director oversight.
